

KEY

- Derived from mainly acidic parent materials } Deep well drained mineral
- Derived from mainly basic parent materials }
- Derived from mainly acidic parent materials } Shallow well drained mineral
- Derived from mainly basic parent materials }
- Derived from mainly acidic parent materials } Deep poorly drained mineral
- Derived from mainly basic parent materials }
- Derived from mainly acidic parent materials } Poorly drained mineral soils with peaty topsoil
- Derived from mainly basic parent materials }
- Mineral podsolised soils and peaty topsoil with occasional iron pan layer
- Mineral alluvium
- Peaty alluvium
- Marl type soils
- Lacustrine alluviums
- Lowland
- Cutaway
- Aeolian undifferentiated
- Beach sand and gravels
- Marine/ Estuarine sediments
- Made Ground (formed by infilling)
- Water Body
