Subject: Boyne Greenway Public Consultation: Drogheda to Mornington

Dir Sir/Madam,

We are writing in relation to the Boyne Greenway Public Consultation, for the Boyne Greenway Drogheda to Mornington pedestrian and cycleway linking Drogheda Town in County Louth to Mornington Village in County Meath.

[REDACTED] fully supports the Boyne Greenway Drogheda to Mornington proposals and feel this section of greenway will further enhance what will be a fantastic greenway. With the plans to connect the Boyne Greenway from Oldbridge to Navan, the route has the potential to rival any greenway in Ireland and be a massive tourist destination in the heart of the Boyne Valley. We can all see the huge benefits the Waterford and Great Western Greenways have brought to those regions and the Boyne Greenway has the potential to match if not surpass those.

Furthermore, this particular section linking the Boyne Greenway to the east coast at Mornington is vital to the long-term prospects of the region. Eventually it will connect up with the Fingal Coastal Way in North County Dublin, making a greenway all along the east coast, making it possible to cycle from the heart of Dublin to Drogheda, and on to Navan and beyond and all the attractions of the Boyne Valley. In effect, Ireland's east coast answer to the Wild Atlantic Way.

The benefits of cycling and walking amenities are also vital to the public for a vast number of reasons, especially in these times when outdoor recreational space is very much needed. We hope to see the full potential of the Boyne Greenway delivered.

Regards,
