13. ENVIRONMENT

Local authorities play a significant role in the enforcement of environmental legislation nationally Staff in Local Authorities enforce over 500 environmental protection obligations arising from more than 100 pieces of legislation. This includes compliance with waste management, water quality and Air Quality /Noise legislation.

In addition to the above roles, Meath County Council has an active environment awareness programme that encompasses schools as well as the community and commercial sectors to promote sound environmental practices.

Meath County Council like all local authorities are uniquely positioned to lead when it comes to climate action. We are close to our communities, and our significant range of services put us in constant contact with the public. This leadership role is recognised in the Climate Action and Low Carbon Development (Amendment) Act 2021 and the subsequent Climate Action Plan which provides a detailed plan for taking decisive action to achieve a 51% reduction in overall greenhouse gas emissions by 2030 and setting us on a path to reach net-zero emissions by no later than 2050

The environment department will be central to the preparation of a new Council Climate Action Plan which is a statutory requirement arising from the 2021 Act.

The department also deals with derelict sites, manages flooding mitigation measures and allocates Casual Trading permits.
