Title: Route change

I suggest that the road from the Dublin Road to the Navan Road join the Navan road at the Newtown Junction. This would allow for another road from that junction on to the Athboy road at the rear of the Navan road estates. If a road from the athboy Road to the Navan road and onto the Dublin road that would reduce a lot of traffic through the town. If the existing road route is followed then it comes to a dead end in front of the garage on the Navan road and this possibility is excluded.
